

The Job-Seeking .NET Developer's LinkedIn Handbook

By [Stefan Đokić – TheCodeMan.net](https://thecodemanager.net)

Hey there, fellow .NET developer! 🙌

Let's be real - LinkedIn isn't exactly our favorite IDE.

But the truth is, **your profile is doing job interviews for you all the time** - even when you're busy fixing that one flaky integration test.

So why not give it the love it deserves?

This guide breaks everything down for you - what to write, how to stand out, and how to make recruiters think: "This dev is solid. Let's talk."

1. Profile Photo that Doesn't Look Like a Webcam Screenshot

A clean, professional photo gets 14x more views.

You don't need a suit - but do look like someone a company would want to work with.

Tips:

- Use natural light or a ring light.
- Plain background (a wall works fine).
- Look at the camera. Smile like you just fixed a production bug.
- Give somebody a phone to take a photo, **don't do selfies!**

Tools:

- [Snappr Photo Analyzer](#)
- AI Headshot tools like [Portrait Pal](#)
- [Canva](#)

Good examples:

1. <https://www.linkedin.com/in/djokic-stefan/>
2. <https://www.linkedin.com/in/ryan-wiens/>
3. <https://www.linkedin.com/in/janjajovanovic/>

2. Custom LinkedIn URL

Make it short and sweet: [linkedin.com/in/janedotnetdev](https://www.linkedin.com/in/janedotnetdev)

Or you can use combination of your first and last name, like I do:

<https://www.linkedin.com/in/djokic-stefan/>

Why?

Recruiters often Google your name. This makes it easier for them to find you.

How to do that?

URL: [Change it here.](#)

TheCodeMan.NET Newsletter

Every Monday morning, start the week with a cup of coffee and 1 actionable .NET tip that you can use right away.

Public profile & URL

www.linkedin.com/in/djokic-stefan

See who's hiring on LinkedIn.

3. Headline That Gets You Found (and clicked)

Your headline is your code comment to the world. Make it meaningful.

Formula: [Job Title] | [.NET Tech] | [What You're Awesome At]

Examples:

- “.NET Developer | ASP.NET Core | Building Clean, Fast APIs”
- “Full-Stack Dev | .NET + Blazor | Scalable Web Apps | Clean Code”

The screenshot shows a LinkedIn profile for Stefan Đokić. The banner image is purple and yellow, featuring a circular profile picture of Stefan, a laptop displaying a presentation, and the text "TheCodeMan.NET Newsletter". The banner also includes the text "Every Monday morning, start the week with a cup of coffee and 1 actionable .NET tip that you can use right away." and a Microsoft MVP logo. Below the banner, the profile name "Stefan Đokić" is followed by a verified badge. The headline, "I help you to improve your .NET knowledge! | Microsoft MVP", is highlighted with a red box. The location "Niš, Centralna Srbija, Serbia" and a link to "Contact info" are shown. The profile has "94,143 followers" and "500+ connections". At the bottom, there are buttons for "Open to", "Add profile section", "Enhance profile", and "Resources". To the right of the profile, the company "EXLRT" and the "Faculty of Electronic Engineering, University of Nis" are listed.

4. The ‘About’ Section That Actually Sounds Like You

This is your pitch - but friendly and human.

Structure:

- Start strong: “I’m a .NET dev who loves turning spaghetti code into scalable systems.”
- Drop experience and wins.
- Show passion: “I geek out over DDD, Blazor, and everything Clean Architecture.”
- End with an invite: “Always happy to chat about code or collab - DMs open!”

Example:

I'm a full-stack .NET developer with 5+ years of experience building enterprise software using ASP.NET Core, EF Core, and Azure. I've shipped everything from internal tools to customer-facing platforms. I write clean, testable code and love geeking out over performance tweaks and architecture patterns. Let's connect!

Look at my friend's profile: [Nick Cosentino](#):

About

I'm a software engineering manager focused on helping software engineers level up.

My name is Nick, and I've had the pleasure of working with many brilliant software engineers at startups and within Big Tech. While I am a software engineer at heart, spending much of my personal time creating software solutions, my mission is to help other software engineers get better at what they do.

I enjoy creating and sharing content about software engineering in general as well as the C# / dotnet ecosystem. My content has a unique twist in that I try to include perspective from a software engineering manager wherever possible.

Check out my weekly newsletter:
<https://www.devleader.ca/newsletter>

And make sure you subscribe on YouTube for multiple full-length videos every week:
<https://www.youtube.com/@devleader>

Whether you're a skilled senior software engineer or you're just getting started in your software engineering journey, I hope that my experiences can help guide you along the way!

 **Top skills**
Software Development • Agile Methodologies • Software Design • C#

5. Experience – Write It Like a Dev, not a Resume Bot

List of what you did, how you did it, and what happened because of it.

Format:

- Short description of the company and role
- 3-5 bullet points of impact
- Or 2-3 sentences of what your role was
- You can include Company Media URLs

Experience

**Senior .NET Developer**
EXLRT · Full-time
Jul 2019 - Present · 5 yrs 10 mos
Serbia

Working on developing software solutions in the field of management of the people and activities, CRMs and security and safety for companies from Fortune 1000 group.
The software I develop is used by tens of thousands of people.
Also within the EXLRT blog, I write posts about the latest technologies in the .Net programming area.

Co-Founder
Take Care · Self-employed
Jun 2019 - Feb 2021 · 1 yr 9 mos
Serbia

We are a startup company dedicated to the development of Smart Medical Dispenser which is focused on patients who frequently take medications or vitamin supplements, or attendants who take care of pat ...see more

Full-stack Developer
INGSOFTWARE · Full-time
Aug 2018 - Jul 2019 · 1 yr
Nis, Centralna Srbija, Serbia

Example: Senior .NET Developer, DevOpsify | 2021 - Present

- Migrated 3 legacy apps to .NET 8 with zero downtime
- Introduced async patterns to boost API response by 35%
- Built internal tools that saved 200+ hours/month for ops team

6. Education & Certs (Yes, Add the Udemy stuff too)

Degrees, bootcamps, courses - if it made you better, it belongs here.

Add:

- Bachelor's or Master's (if applicable)
- Microsoft or Azure certifications
- Pluralsight, Udemy, or LinkedIn Learning courses (Don't put everything)

Pro tip: Include keywords in your cert/course titles (like "Blazor" or "Azure Functions").

7. Skills & Endorsements (Your Secret SEO Sauce)

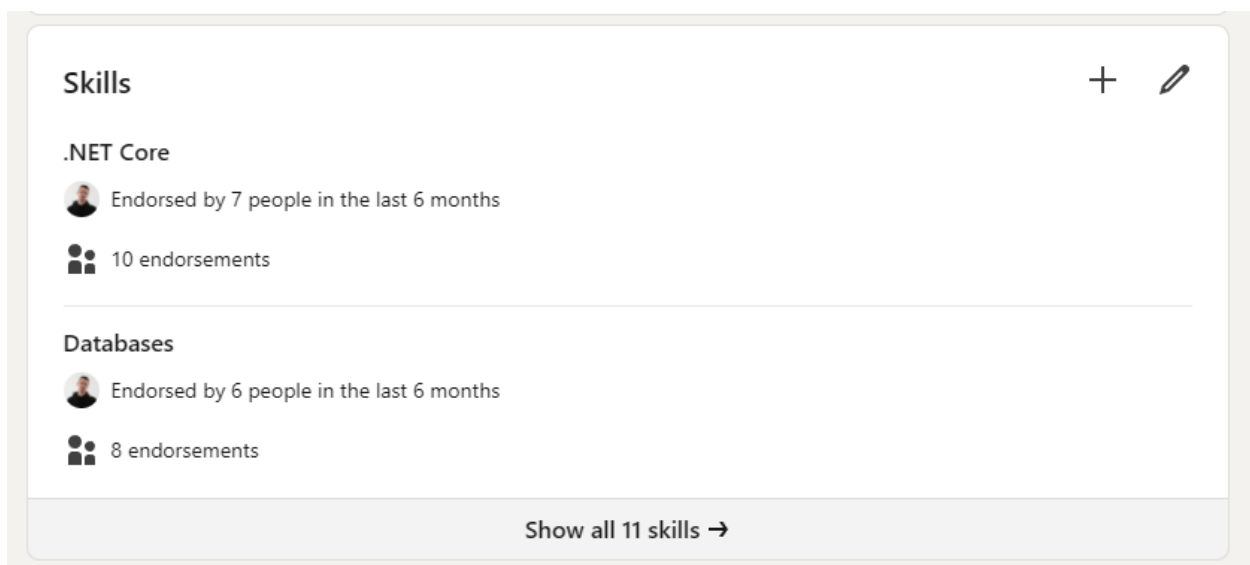

These keywords help you show up in recruiter search.

Some .NET Skills:

- C#, ASP.NET Core, Entity Framework
- LINQ, Blazor, Razor Pages, Dapper
- SQL Server, Azure, Docker, REST APIs
- Git, Unit Testing, SOLID, CQRS, MediatR

Tips:

- Add 10-20 total skills
- Make your top 3 visible and strong
- Ask teammates to endorse you (and return the favor)
- **DON'T PUT SKILLS YOU DON'T HAVE!**

8. Recommendations That Don't Feel Like Fluff

Aim for 2-3 solid ones from managers, peers, or clients.

Ask like this:

“Hey! Would you mind dropping a LinkedIn recommendation about the Blazor dashboard project we worked on? Just a short note is perfect.”

Example:

Recommendations

Show all pending + ✎

Received Given

Sina Riyahi · 1st
Software Developer | Software Architect | SQL Server Developer | .Net Developer | .Net MAUI | Angular Developer | React Developer
September 6, 2022, Sina worked with Stefan on the same team

Stefan is a wonderful programmer, he is very advanced and up-to-date in his specialty.
He is learning and teaching beginner and junior programmers every day.
In the future, he will achieve many successes in his field of expertise.

Marko Ilic · 1st
Software Engineer | Tech Enthusiast | Passionate about Backend Development and Continuous Learning
April 20, 2020, Marko worked with Stefan on the same team

Stefan's enthusiasm helps us at Take Care to go beyond what we think we are capable of. Also, he is a great entrepreneur, always thinking of a new way to help people and start a business that will make a change. He is a great programmer and he inspires me to become better.

Show all 4 received →

9. Projects, Posts & Proof

Show what you've built or written. Add value beyond your job titles.

Ideas:

- GitHub links
- Side projects: SaaS apps, tools, templates
- Blog posts about performance tuning, testing, architecture
- Talks you gave or events you attended

10. Be Active (but not cringe)

Engaging makes your profile 10x more discoverable.

Do:

- Share dev wins: “Just published a Blazor starter kit!”
- Post small tips: “Avoid this EF Core gotcha...”
- Comment on other devs’ posts (add value – without “Good post, nice content”)
- Use hashtags: `#dotnet` `#csharp` `#blazor` `#azure`

11. Tools That Make This Easier

- **Jobscan LinkedIn Optimizer** – check how your profile ranks
- **Teal** – track jobs and manage applications
- **Snappr** – analyze your photo quality
- **Wiza** – outreach automation if you want to connect with recruiters

Final Thoughts

LinkedIn isn't just for applying, **it's where the best jobs find you.**

Treat your profile like the personal README of your career.

Keep it clean, updated, and real.

Dream BIG!
